Hardware

ARK provides a choice of pulls. Pulls are available with plated or powder coated finishes.

Finishes

The first step towards building a quality piece of furniture lies in obtaining the finest materials. ARK has the most stringent veneer and hardwood grading standards in the industry. These fine materials are finished with a conversion varnish system. Conversion varnish offers superior performance over other finishing processes.

Our standard finishes are shown to the right. It would take an impossibly large standard color palette to satisfy the varied project requirements within the office furniture industry. To accommodate that extensive color spectrum, we will gladly match a finish to a sample provided to us – usually with no upcharge.
